

2017 Winter Boys & Girls Basketball LEAGUE

This will be a recreation league, with teams forming in NK and surrounding communities.
Divisions for all boys and girls, grades 2nd through 8th.

7/8th Gr. girls league starts practices Nov, games are Sundays starting Dec 4th thru Jan 29th!

All other grades, practice can start wk of Nov 28th, games start Jan 14th.

Please mail completed form to:
City of Poulsbo P&R Basketball,
200 NE Moe Str., Poulsbo, WA 98370

FOR MORE INFO, CALL
City of Poulsbo Parks and Recreation

360-779-9898

Fax: 360-779-5917 or contact by email to:
jschiel@cityofpoulsbo.com

Fee: 2nd-4th grade: \$119
Fee: Girls 7th-8th grade: \$125
Fee: Boys 5th-8th, 5th/6th girls: \$135

This registration is for a:
BOY GIRL
CIRCLE ONE
Coach or buddy requests?

Moms and Dads!
Are you interested in coaching a team?

If you have some free time that you can contribute to a very exciting (and potential long time hobby!) please give us a call! The kids really do benefit from our efforts and so will you!

Please contact Joe at P&R;
360-731-1938, or jschiel@cityofpoulsbo.com

Parental/Legal Guardian Assumption of Risk, Waiver and Release

I (we) am/are the parent(s) or legal guardian of _____ (Child's Name) who desires to be a participant in the City of Poulsbo's sponsored recreational activity of

BASKETBALL Team and league practices and games _____ (Describe)

It is important to me (us) that this child be allowed to participate in this activity. I (we) understand there are special dangers and risks inherent in this activity, including but not limited to, the risk of serious physical injury, death or other harmful consequences which may arise directly or indirectly from the child's participation in this activity. Being fully informed as to these risks and in consideration of the City of Poulsbo allowing my child to participate in this sponsored activity and/or use of the City of Poulsbo's facilities I (we), on behalf of myself (ourselves) and on behalf of the above-named participant child, assume all risk of injury, damage and harm to the child which may arise from the child's participation in the activities or use of the City of Poulsbo's facilities. I (we) further agree, individually and on behalf of the above-named child, to release and hold harmless the City of Poulsbo, its officials, employees, volunteers and agents and agree to waive any right of recovery that I (we) may have to bring a claim or lawsuit for damages against them for any personal injury, death or other harmful consequences occurring to the above-named child or me arising out of the Child's voluntary participation in this activity. I (we) grant my (our) full and voluntary consent for the above-named child to participate in the activity described.

I hereby consent to allow my child's picture or likeness to appear in any official document, Member website, sponsor advertisement and/or Member produced television coverage of sponsored recreational activity without compensation to me.

North Kitsap School District Concussion Fact Sheet

for High School Sports
Fact sheet for **STUDENT-ATHLETES**

What is a concussion?

A concussion is a brain injury that:

- Is caused by a bump, blow, or jolt to the head.
- Can change the way your brain normally works.
- Can range from mild to severe.
- Can occur during practices or games in any sport.
- Can happen even if you haven't been knocked out.
- Can be serious even if you've just been "dinged" or had your "bell rung."

How can I prevent a concussion?

It's different for every sport. But there are steps you can take to protect yourself from concussion.

- Follow your coach's rules for safety and the rules of the sport.
- Practice good sportsmanship at all times.
- Use the proper sports equipment, including personal protective equipment (such as helmets). In order for equipment to protect you, it must be:
 - Appropriate for the game, position, and activity
 - Well maintained
 - Properly fitted
 - Used every time you play

What are the symptoms of a concussion?

- Nausea (feeling that you might vomit)
- Balance problems or dizziness
- Double or fuzzy vision
- Sensitivity to light or noise
- Headache
- Feeling sluggish
- Feeling foggy or groggy
- Concentration or memory problems (forgetting game plays)
- Confusion

What should I do if I think I have a concussion?

- **Tell your athletic trainer, coaches and your parents.** Never ignore a bump, blow, or jolt to the head. Also, tell your coach if one of your teammates might have a concussion.
- **Get a medical check up.** A licensed health care professional can tell you if you have had a concussion and when you are OK to return to play.
- **Give yourself time to recover.** If you have had a concussion, your brain needs time to heal. While your brain is still healing, you are much more likely to have a second concussion. Second or later concussions can cause permanent brain damage, and even death in rare cases. Severe brain injury can change your whole life.

How do I know if I've had a concussion?

You can't see a concussion, but you might notice some of the symptoms right away. Other symptoms can show up days or weeks after the injury. It's best to see a health care professional if you think you might have a concussion. An undiagnosed concussion can affect your ability to do schoolwork and other everyday activities. It also raises your risk for additional, serious injury.

It's better to miss one game than the whole season.

North Kitsap School District Concussion Fact Sheet

for High School Sports Fact Sheet for **Parents**

What is a concussion?

A concussion is a brain injury. Concussions are caused by a bump, blow, or jolt to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even a “ding” or a bump on the head can be serious.

What are the signs and symptoms of concussion?

You can't see a concussion. Signs and symptoms of concussion can show up right after the injury or can take days or weeks to appear. If your teen reports any symptoms of concussion, or if you notice the symptoms yourself, seek medical attention right away.

Signs observed by athletic trainer, coaches, parents or guardian	Symptom reported by athlete
<ul style="list-style-type: none"> ◆ Appearing dazed or stunned ◆ Is confused about assignment ◆ Forgets plays ◆ Is unsure of game, score, or opponent ◆ Moves clumsily ◆ Answers questions slowly ◆ Loses consciousness ◆ Shows behavior or personality changes ◆ Can't recall events prior to hit ◆ Can't recall events after hit 	<ul style="list-style-type: none"> ◆ Headache ◆ Nausea ◆ Balance problems or dizziness ◆ Double or fuzzy vision ◆ Sensitivity to light or noise ◆ Feeling sluggish ◆ Feeling foggy or groggy ◆ Concentration or memory problems ◆ Confusion

What should you do if you think your teenage athlete has a concussion?

- Seek medical attention right away. A health care professional will be able to decide how serious the concussion is and when it is safe for your teen to return to sports.
- Keep your teen out of play. Concussions take time to heal. Don't let your teen return to play until a health care professional says it's OK. Athletes who return to play too soon—while the brain is still healing—risk a greater chance of having a second concussion. Second or later concussions can be very serious. They can cause permanent brain damage, affecting your teen for a lifetime.
- Tell your teen's athletic trainer and coaches about any recent concussion. Athletic Trainers and coaches should know if your teen had a recent concussion in ANY sport. Your teen's athletic trainer and coaches may not know about a concussion your teen received in another sport or activity unless you tell them. Knowing about the concussion will allow the athletic trainer and coach to keep your teen from activities that could result in another concussion.
- Remind your teen: It's better to miss one game than the whole season.

It's better to miss one game than the whole season.

Sudden Cardiac Arrest

Information Sheet for Student-Athletes, Coaches and Parents/Guardians

SSB 5083 ~ SCA Awareness Act

What is sudden cardiac arrest? Sudden Cardiac Arrest (SCA) is the sudden onset of an abnormal and lethal heart rhythm, causing the heart to stop beating and the individual to collapse. SCA is the leading cause of death in the U.S. afflicting over 300,000 individuals per year.

SCA is also the leading cause of sudden death in young athletes during sports

What causes sudden cardiac arrest? SCA in young athletes is usually caused by a structural or electrical disorder of the heart. Many of these conditions are inherited (genetic) and can develop as an adolescent or young adult. SCA is more likely during exercise or physical activity, placing student-athletes with undiagnosed heart conditions at greater risk. SCA also can occur from a direct blow to the chest by a firm projectile (baseball, softball, lacrosse ball, or hockey puck) or by chest contact from another player (called "commotio cordis").

While a heart condition may have no warning signs, some young athletes may have symptoms but neglect to tell an adult. If any of the following symptoms are present, a cardiac evaluation by a physician is recommended:

- Passing out during exercise
- Chest pain with exercise
- Excessive shortness of breath with exercise
- Palpitations (heart racing for no reason)
- Unexplained seizures
- A family member with early onset heart disease or sudden death from a heart condition before the age of 40

How to prevent and treat sudden cardiac arrest? Some heart conditions at risk for SCA can be detected by a thorough heart screening evaluation. However, all schools and teams should be prepared to respond to a cardiac emergency. Young athletes who suffer SCA are collapsed and unresponsive and may appear to have brief seizure-like activity or abnormal breathing (gaspings). SCA can be effectively treated by immediate recognition, prompt CPR, and quick access to a defibrillator (AED). AEDs are safe, portable devices that read and analyze the heart rhythm and provide an electric shock (if necessary) to restore a normal heart rhythm.

Remember, to save a life: recognize SCA, call 9-1-1, begin CPR, and use an AED as soon as possible!

Cardiac 3-Minute Drill

1. RECOGNIZE

Sudden Cardiac Arrest

- Collapsed and unresponsive
- Abnormal breathing
- Seizure-like activity

2. CALL 9-1-1

- Call for help and for an AED

3. CPR

- Begin chest compressions
- Push hard/ push fast (100 per minute)

4. AED

- Use AED as soon as possible

5. CONTINUE CARE

- Continue CPR and AED until EMS arrives

**Be Prepared!
Every Second Counts!**
