If weather is questionable, please call the Recreation Center at 360-779-9898 before traveling to a Parks & Recreation sponsored program.
ROUND UP FOR RECREATION
This is a fee-reduction/scholarship program, which you, the community, can support with donations.

Any time you register for a program and want to give a little back to those in need, just "round up" your payment amount and we’ll put it into the fund. When you register online, click the DONATION box to donate. If you’re in the office, just ask the receptionist.

For instance, if a gymnastics class costs $35, you could round up the payment to $40. $5 would then go into the Round Up for Recreation fund. Thank you for helping.

The Gymnastics Program has been an integral part of Poulsbo Parks & Recreation since the City took over the Recreation Center in 1995. Our gymnastics program builds the flexibility, balance, and strength that participants can use in any sport – not just gymnastics! Participants learn about perseverance, patience, trusting others, managing risk, and countless other life skills!

Poulsbo Parks & Recreation takes pride in our gymnastics classes, instructors, and facility at the Recreation Center and at Breidablik Elem. Classes are offered to youth as young as 18 months up to 18 years old, providing a variety of classes for your child’s needs. Please read the class descriptions below.

Our recreational gymnastics program builds confidence in its participants in an encouraging, safe, and non-competitive environment. Our recreational gymnasts learn to love the sport of gymnastics and watch their skills progress at their own paces. Recreational gymnastics classes serve everyone from parent and child classes through level four of the gymnastics progression. Classes are offered Monday through Thursday!

Poulsbo Parks & Recreation also now offers classes modeled after USA Gymnastics Xcel program, a program designed to offer a broad-based, affordable competitive experience outside the traditional Jr. Olympic Program to attract and retain a diverse group of athletes. We are excited to explore the possibility of a competitive gymnastics program for the future.

Who’s teaching? Gymnastics supervisor and coach Kris Goodfellow has over 22 years of coaching experience. Kris is the North Kitsap High School head gymnastics coach, and the North Kitsap School District’s 2002 & 2014 Coach of the Year and the 2010 and 2014 WSGCA Coach of the Year. She is safety certified by USA Gymnastics and is also a Kinder Accredited Teacher through USA Gymnastics. Kris will coach classes held at Breidablik Elem and in the mornings at the Recreation Center. Other coaches include NKHS gymnasts Junko Ketch, Kelli Stevens, and Ashlyn Allen, along with Leah Lovely.

SNOW DAYS
If the North Kitsap School District closes due to weather conditions, classes marked with a snowflake will be cancelled for the day. Classes beginning before 11 am that are marked with a snowflake will be cancelled if North Kitsap Schools are on a 2-hour delay.

JOIN THE NORTH KITSAP MOUNTAIN VIKES MOUNTAIN BIKE CLUB!

GRADES 7-12

We are looking for riders to join us for the fun and challenge of riding trails here in North Kitsap. All you need is a mountain bike, a helmet, and a can-do attitude and you can learn and improve your skills on the bike. We’ve teamed up with the Evergreen Mountain Bike Alliance and Silverdale Cyclery to provide expert instruction on everything from mountain bike basics to jumping, cornering, and shredding local trails. Club members will participate in two rides per week and will have the opportunity to participate in trail building and maintenance with Evergreen Mountain Bike Alliance. Work party dates will be announced at the first meeting date of a class. We encourage parents to grab a bike and join in the fun.

Club members will receive a membership with the Evergreen Mountain Bike Alliance, a bike safety check, a water bottle, and tire tube. Our rides are just that - rides, not races. While riders of all skill levels are welcome, we do require an 11-speed or greater mountain bike and recommend at least 26” rims/tires. Also, some previous mountain biking experience is helpful too - our Evergreen coaches will take it from there and soon you’ll be shredding Port Gamble and other local trails! Our main goal is to have fun, but we also want to challenge ourselves and improve our skills and therefore the fun of being on a bike! You will also need your own helmet and eye protection for each ride. Should you have questions, please feel free to contact Coach Hensley @ 206 295 5904, or Coach Tanner @ 360-440-2221. Life is better on a mountain bike!

COACHES, COACHES, COACHES!
It’s never been more important! Families, community, and individuals joining together for our young people.

To be successful, youth sports programs need caring, compassionate adults who are willing to devote some of their limited time to the kids. You don’t have to be an expert on the sport of choice! We have lots of helpful resources, including people that are willing to help you help our kids enjoy themselves.

This is quality time for our young people. They are practicing physical and mental skills, interacting with their peers and adults in a healthy atmosphere and learning the ability to compete towards a goal as part of a team and as an individual. Call Joe at Parks and Rec, (360) 731-1938, for more information on this valuable opportunity.

RECYCLE PREVIOUSLY PURCHASED PURPLE & GOLD JERSEYS!
If you have a purple and gold jersey used in the Parks and Rec basketball program that is still in good condition (no tears, numbers clearly visible, and clean), you can turn them in for a $5 credit. Also, if you wish to purchase a used jersey, the cost is $5!

INTERESTED IN BEING A BASKETBALL OFFICIAL?
Poulsbo Parks and Recreation basketball leagues use paid officials. If you are interested in working as an official, please give us a call (360-731-1938) or email jschiel@cityofpoulsbo.com and we’ll get you started! Games commence early October and continue through end of May! Saturday games starting January 11th. Normally 2 officials per court per game.

Shannon Singleton has been clogging for 10 years. Shannon Singleton. Looking for a fun way to get more exercise? Try clogging! Clogging has its origins in the folk dances of Ireland, England, Scotland, and Africa. Settlers in the American South took elements of these styles to form a unique American step dance, Appalachian clog dancing. Modern clogging has continued to evolve with influences by country-western line dancing, jazz tap and Irish and Canadian step dance as well. Dance steps are done in time with the music, usually with the heel keeping rhythm on the downbeat. We dance in lines with a cuer calling the steps to a variety of music styles. No partner or prior dance experience needed! No special footwear is needed to begin but shoes with a leather bottom may be easier to dance in than tennis shoes. DRAWING ON THE RIGHT SIDE OF THE BRAIN  4 WKS
Drawing Unplugged: Trick Your Inner Art Critic- You CAN Draw!
Deborah Simon. How about a drawing class for those who don’t know how to draw, believe they can’t draw, or want to improve their skills without appearing inadequate in a room full of artists? Judgment and reason are important brain functions, but they can easily overtake the quieter creative risk-taking that is invaluable in any problem-solving situation. Nurturing the sensitive, free-thinking spirit in this skill has to be done in a way that circumvents reason and tricks judgment into silence. This class features drawing lessons that will teach students to find that risk-taking part of their brains and learn how to give it a voice. Once that voice is allowed to speak, students not only see that they CAN draw, they learn how to make that subtle switch from reason to creativity in other areas of life. This is the real and lasting skill and accomplishment in drawing and art. Activities will cover perspective, positive and negative space, still life, and portrait drawing. A materials list will be available at registration. Recreation Center Classroom.

BULBS FOR SPRING COLOR
An inspiring and information-filled slideshow “walk” through over 100 of the most stunning and easiest flowers we can and should plant. There’s a lot more than just daffodils and tulips (but this class covers some special versions of those, as well). A materials fee of $2 is due to the instructor at the start of class.
Wed Sep 25  6:30-9p  $15

PERENNIALS FOR PNW GARDENS – THE BEST, THE SPECIAL, THE RARE
An inspiring illustrated slideshow “walk” through over 100 of the plants that keep on giving. Covers the tried-and-true, the spectacular and the one-of-a-kind (in your neighborhood, at least). A materials fee of $5 is due to the instructor at the start of class.
Thu Oct 3  6:30-9p  $15

CREATING A NATIVE LANDSCAPE
An introduction to the plants of Northwest Washington that look good and do well as landscape plants, and how to lay out a garden with them. Native plants thrive on our soils, do well with whatever rain comes our way and hold up to most diseases and pests our gardens might ordinarily get. Natives are also the best way to encourage birds, butterflies, bees, and other pollinators. The class covers which do well in shade, sun, wet soils, dry soils, etc. Plenty of landscape design tips. A materials fee of $5 is due to the instructor at the start of class.
Wed Oct 9  6:30-9p  $15

RIGHT PLANT, RIGHT PLACE
This is THE most important concept to understand to be a successful gardener. This is about how to select plants that really fit your garden and landscape if you want to reduce (or maybe completely eliminate) maintenance and problems. Learn why some of your already struggling plants are struggling. Discover how our type of climate is so important in the plant choices you make and learn what “zone” you’re really in. Find out what makes up our native soils and why they can grow spectacular landscape plants — if you choose right. Finally, this class provides the details of that mysterious and magical thing called “microclimate.” A materials fee of $5 is due to the instructor at the start of class.
Thu Oct 17  6:30-9p  $15

HOW TO DESIGN (OR RE-DESIGN) YOUR LANDSCAPE
Covering the principles of design, some of the important practical steps and plenty of creative tips. For those who are starting with a blank slate to gardeners who want to polish their creation or simply tweak around the edges. A materials fee of $2 is due to the instructor at the start of class.
Wed Oct 23  6:30-9p  $15
**WHAT GARDENERS NEED TO KNOW ABOUT SOIL**
This class is about the science, the spirit, and the soul of soil. It covers what soil is made of — hint: it’s not “dirt” — with emphasis on humus and the living community (the “edaphon”). Plus, what some of our native soils are like and how water moves on and in your own soil. Before you crank up the tiller, step on that shovel or put down that layer of wood chips, you need to attend this class. It’s suggested students take the sequel class, “Taking Care of Your Soil,” after this one.

Thu Oct 31  6:30-9p  $15

**TAKING CARE OF YOUR SOIL**
There’s plenty of old myths and bad practices when it comes to helping garden soil become the best it can be. This class will dispel some of those and provide insight and practical steps to truly improve the overall health of your soil. Spoiler: it doesn’t include amending. Although not necessary, it’s highly recommended to also take “What Gardeners Need to Know about Soil” before this class. A materials fee of $2 is due to the instructor at the start of class.

Wed Nov 6  6:30-9p  $15

**SOME GARDENING FUNDAMENTALS FOR BEGINNERS**
The basics: climate and climate zones, when to plant what, buying the best plants, improving soil, planting methodology, watering principles and techniques, some pruning nitty-gritty, a few good words to know, along with the one principle that leads to more gardening success than any other. In advance of the class, students will receive an “e-out” of the most common mistakes and the biggest myths of gardening. A materials fee of $2 is due to the instructor at the start of class.

Thu Nov 14  6:30-9p  $15

**HOUSE PLANT ESSENTIALS**
Indoor plants are proven to enhance our health, productivity, and creativity, and in this fast-paced world they also help calm us down. This class will help you create an indoor garden — or jungle — starting with the basics of finding the right plant for the spot you have and how to keep it thriving. Includes the basics of potting, watering, and feeding along with some pest and disease management tips. By the way, this class has nothing to do with that popular fingery green-leafed plant so popular in the PNW. A materials fee of $2 is due to the instructor at the start of class.

Wed Jan 8  6:30-9p  $15

**SEEDS: BASICS OF SOWING**
If you’re planning on sowing early indoors, here’s what you need, what the seeds and seedlings need and what it takes to get your babies from the house to the garden. Or if you’re sowing directly to the garden soil, this also includes how to do it most efficiently and effectively. Plus, the scoop on “open-pollinated,” “heirlooms” and “hybrids.”

Thu Jan 16  6:30-9p  $15

**ALL ABOUT THE SHADE GARDEN**
Planning and maintaining this ubiquitous PNW garden concept. The best plants (with a slide show), useful design tips and, of course, ways to prevent the problems unique to shady sites. A materials fee of $5 is due to the instructor at the start of class.

Wed Jan 22  6:30-9p  $15

**GARDEN PEST MANAGEMENT WITHOUT PESTICIDES**
Managing garden pests is not about which pesticide to use or which homemade concoction works on the garden beasties. It’s about being proactive rather than reactive; it’s about putting that ounce of prevention to work for you. This class presents an integrated approach to keeping your plants — the ornamental and the
edible – free from diseases and insects in multiple ways. And just in case something does find its way into your
yard, we’ll tell you how to tackle it in proven ways. **A materials fee of $5 is due to the instructor at the
start of class.**

Thu  Jan 30  6:30-9p  $15

**CONTAINER GARDENING**

What you and the plants need, how to plant the plants, how to grow them (covering watering and feeding and
pinching), plus creative container garden tips. Covers seasonal containers and perennial containers. **A materials fee of $2 is due to the instructor at the start of class.**

Wed  Feb 5  6:30-9p  $15

**SEASONAL SUMMER COLOR – FLOWERS AND FOLIAGE FROM ANNUALS, BULBS AND TENDER PERENNIALS**

These are the glamorous shooting stars of the summer garden, the ones that fill in the gaps, make the bold
statements and can fit in almost anywhere. For those who like to lush up their gardens. **A materials fee of $5
is due to the instructor at the start of class.**

Thu  Feb 13  6:30-9p  $15

**WEEDS!!**

A full-on approach to overcoming the biggest complaint in gardening. Why weeds are weeds and what to do
to minimize them from happening. **A materials fee of $2 is due to the instructor at the start of class.**

Wed  Feb 19  6:30-9p  $15

**VEGETABLE GARDENING – A BEGINNER’S GUIDE**

This class starts with the basics of location, timing and whether to use seeds or plants. Then it’ll cover the
best ways to build a better soil and onto the “intensive” practices of raised beds, close spacing, interplanting,
succession and relay planting, vertical gardening, no-till mulching, and rotation. Along with a few tips on pest
management. All in 2 ½ hours; bring a fast pencil. **A materials fee of $5 is due to the instructor at the
start of class.**

Thu  Feb 27  6:30-9:00p  $15

**EASY PLANTS FOR AN EASY LANDSCAPE**

Low maintenance starts with the right plant. If you’d like to save time and money, pick the plant that fits the
climate, the soil, the environment. Really nice slide show. **A materials fee of $5 is due to the instructor at the
start of class.**

Wed  Mar 4  6:30-9:00p  $15

**BIRD AND BUTTERFLY GARDENING**

This class with a beautiful slide show illustrates how to add the components necessary to turn your landscape
into a magnet for these flying beauties. Bonus: guidelines for a pollinator garden. **A materials fee of $2 is due to the instructor at the start of class.**

Thu  Mar 12  6:30-9:00p  $15

**GREAT TREES**

Trees are the “big bones” of every landscape and it’s important to choose trees that suit your conditions, are in
scale with your house and property, and fit in with the amount of maintenance you want to give. This class with
slide show covers the best trees for Kitsap, with emphasis on those for smaller properties (but enough of the
grand guys to please the even the large-scale gardener). **A materials fee of $2 is due to the instructor at the
start of class.**

Wed  Mar 18  6:30-9:00p  $15

CONFLICT RESOLUTION 4 WKS
Deborah Simon. Who doesn’t find themselves in the midst of conflict on a daily basis? Because we live in society, conflict is a fact of life, but amazingly, it is a fact that is frequently misunderstood and rarely a subject of study outside of psychological and sociological circles. Add in emotions and you have a recipe for avoidance at best and disaster at worst. Why do we fight other people? How should we respond when confronted? What makes us so angry at one time and not another—with one person and not another? In this class, we will peel back those layers and discover, individually and together, what conflict is, what our role is, how we each respond to it, how to be our own master, and what impact communication and perspective have on conflict resolution. Class requirements/prerequisites: We will be involved in many activities during this class. Students must come prepared to have fun with a good attitude, but they must also come with an attitude of cooperation so that others can have fun. North Kitsap High School Classroom. Tue/Th Dec 10 & 12 7-9:30p $92* Tu/Th Mar 24 & 26 12-2:30p $92*

RAISING THE OUTLIERS / EDUCATING THE OUTLIERS

Deborah Simon. Do you have (or work with) a child who:

· is wise beyond their years (sometimes with everything but their schoolwork)
· can crumble into sobs, glow with intense happiness, or break down into a tantrum all within the space of a few hours
· doesn’t hear, see, or respond to anything but the narrow focus of what they are working on at the time (usually with anything except housework)
· painfully good at OR painfully unable to read and/or organize themselves?

Then they may be one of the outliers, also known as gifted and/or twice-exceptional, but those terms can be emotionally charged and frequently misunderstood. Applying any of these terms to such intense little humans isn’t a matter of labeling. It’s a way of quantifying who they are so that we can help them succeed at being all they can be. After all, an outlier doesn’t stop being an outlier when they leave school for the day or when they grow up. It’s who they are and how they see the world. Classes held in the Recreation Center Classroom.

RAISING THE OUTLIERS 1 CLASS

Deborah Simon. Come learn about giftedness and twice-exceptionality (2e) and how the gifted/2e mind works. We’ll talk about raising gifted/2e kids, being a gifted/2e kid, and how gifted/2e kids grow up to be gifted/2e adults (and parents!). We’ll explore intensities, quirks, and characteristics. And you’ll leave with resources, ideas, and assurances that you’re not alone in this journey.

Wed Oct 30 7-9p $20
Wed Jan 29 7-9p $20

EDUCATING THE OUTLIERS 1 CLASS

Deborah Simon. Teaching gifted/2e kids is more than just deciding what classes they will take in which school program. Will (can) you homeschool? What about online classes/schools? Or mentoring? We’ll talk about lifelong options for gifted/2e students and investigate avenues for these amazing little learners. You’ll leave with resources, ideas, and a renewed sense of excitement for your role in your student’s life.

SOCIAL SECURITY: WHAT YOU SHOULD KNOW BEFORE YOU RETIRE 1 CLASS

Marilyn Miller. As if navigating Social Security isn’t daunting enough; employees at the Social Security Administration are not trained or allowed to give advice on the numerous benefit options available. There are 2,728 rules for Social Security benefits as well as 567 ways to claim benefits. All the changes put into law Nov 2015 will be discussed. With life expectancy increasing, retirees outliving their income is a major concern. With the number of claiming options that can impact an applicant’s income, it is critical to have somewhere to turn for guidance. This seminar will provide the information for making informed decisions. As a follow up to the course, if requested, attendees will be provided with a written report of their options. Course includes workbook materials. There is no cost for the report, but attendee will need to schedule a time to meet with Marilyn in her Poulsbo office for review. Recreation Center Classroom.

LEARN TO ROW WITH KITSAP ROWING ASSOCIATION

Have you seen our boats out on Liberty Bay and wanted to try rowing? Curious about the fastest growing sport in America, but weren’t sure where to start? Kitsap Rowing Association (KRA) is offering Learn to Row (LTR) classes for anyone who has never rowed in a 4- or 8-person shell before and has an interest in learning the sport. Rowing is a non-impact lifetime sport, and our club has members ages 18 – 70+. Rowing utilizes all of the body's major muscle groups and provides for both a strength and cardio workout. The sport is team oriented and lots of fun. We have a great location at the Poulsbo Marina and row year-round both in the mornings and early evenings. **LTR Participants should have no active knee or back issues, be able to lift 30 lbs overhead, do a squat, and have knee and back flexibility to get in and out of a shell.** Each 12-hour class consist of 3 sessions: one on-land and 2 on-water sessions. The goal of the LTR is to teach you the basics of rowing in preparation to join our regular rowing sessions.

As a member of the US Rowing Association, KRA supports both recreational rowing and competitive rowing. If you have rowed before or would like to cox or coach, please contact us directly. For more information please visit: www.kitsaprowing.org.

SENIOR TRIPS AND EXCURSIONS
Poulsbo Parks and Recreation and Martha and Mary Health Services (MMHS) are pleased to be providing Senior Trips and Excursions for the community! This partnership will utilize MMHS’s comfortable, 16-passenger minibus, while Parks and Recreation will continue to plan and implement fun, day-long excursions throughout the Northwest. We will also be using NW Passage Charters & Tours busses for some of the trips, as noted in the trip description (NWPCT). We will continue to utilize and enjoy the senior trip driver volunteers that you have gotten to know over the years, along with a few new ones.

To reserve a space on a trip, you may register online, come to the Recreation Center, or mail in your registration as soon as you receive your brochure. Fees usually include transportation and ferry, with admission and lunch on your own. Trips fill up quickly, so get your reservation in soon. Waiting lists will be formed for all trips filled. No credit will be issued prior to the trip UNLESS your place can be filled. The departure and return point for all trips is the Recreation Center. We have 3 trips this session that utilize a 24-passenger charter bus. Typically, there is a minimum of 12-13 (or 20 for the larger bus) participants per trip.

*New this session, the bus will stop at Kingston’s Village Green Community Center on selected trips. When you register, there will be a question on your registration that will ask you where you will pick up the bus. You will select Poulsbo Recreation Center or Village Green Community Center.

Please be aware that sometimes our trips run a little behind schedule due to traffic issues, ferry schedules and other uncontrollable situations. Please plan accordingly. Also, these trip descriptions are as up to date as possible as of the print date of this catalog. Occasionally something will change slightly – a menu item, a ferry departure, and the like. We will alert passengers if we feel like the change will modify the trip in any way; otherwise, we will go with any minor changes.

** We are looking for additional volunteer drivers with a CDL and a valid DOT medical exam certificate to drive some of these Senior Trips and Excursions. Please call Mary at 360-394-9772 if you are qualified and interested. **

Walking Assessment:
1) Limited walking, but most is on flat terrain or indoors.
2) Medium walking, including some outdoor situations or possible uneven ground.
3) Quite a bit of walking, but most should be on hard surfaces.

The eruption of Mount St. Helens caused the largest landslide in recorded history, sweeping through the Toutle River Valley and removing 1,306 feet from the top of the volcano. The powerful lava flow, savage winds and deadly heat destroyed much of the previous landscape. What the mountain left behind is the history of a violent eruption that shook the surrounding region and left many with stories of that tumultuous day on May 18, 1980. Located along Spirit Lake Highway, the visitor centers are nothing short of unforgettable and extraordinary, each telling different stories. The awesome views from each of the centers speak for themselves, bringing you face to face with a monumental natural event. We will visit two of the centers today, including the Mt. St. Helens Forest Learning Center and the Johnston Ridge Observatory (up close and personal). Fee includes bus transportation, center admission and boxed lunch. Annual or lifetime recreation passes will get you in for free! We will give you an $8 credit after the trip if you used your lifetime recreation card.
