Poulsbo, WA 98370

**Poulsbo's Fish Park Phase IV Improvements to start September 1**

The City of Poulsbo is pleased to announce that the Poulsbo's Fish Park Phase IV project will begin on September 1, 2020. All of the work will be done on the east side of the park along Bond Road. The City awarded the contract to W.S. Contractors of Buckley.

The project includes parking lot renovation on Bond Road with stormwater improvements, 560 lineal feet of 6' wide sidewalk and 200 lf of boardwalk along the west side of Bond Road to the city owned shoreline parcel on the estuary. An additional 228 lf of elevated boardwalk will lead from the renovated parking lot and into the park. This work will be completed by mid-December.

Volunteer projects this fall will include construction of two new viewing platforms built by community organizations including the Poulsbo-NK Rotary Club and Poulsbo Lions Club. Steering committee volunteers and Kitsap Audubon have created six new interpretive signs which will be installed by volunteers. Once completed, this project will provide public access, environmental improvements and education to ALL parcels in PFP's 40 acres. Project information can be found at <https://cityofpoulsbo.com/parks-recreation-current-projects/>

This project is being funded by the City of Poulsbo and two state grants: one through the Recreation and Conservation Office (Aquatic Lands Enhancement Account) and one through a senate appropriation supported by Senator Christine Rolfes.
