

## Poulsbo Parks and Recreation Summer Fun Geocache

July is National Park and Recreation Month! To celebrate all the Summer Fun that can be enjoyed in our programs and outdoor spaces, we are hiding two separate geocaches in Poulsbo's Fish and Forest Rock Hills parks. Follow the instructions below and enjoy the thrill of the hunt. When you find the cache, take a small reward and leave a note in our log to record your success! For this geocache adventure, there is no need to leave anything in return.

What is Geocaching? Geocaching is a real-world, outdoor treasure hunting game using GPS-enabled devices, like your smartphone. Participants navigate to a specific set of GPS coordinates and then attempt to find the geocache (container) hidden at that location.

How do I do it? There is an official Geocaching website that has free basic functions, but Poulsbo Parks and Recreation has created our own geocache using the free mapping app CalTopo. To get started on your first find, follow these simple steps:

1. Download the free CalTopo app to your smartphone.
2. Follow the app instructions to get set up.
3. Once the app is set up, Tap on the three bars in the upper left.
4. Then tap on "Scan QR Code"
5. Scan the code below of the location you want to search in. This will load the map with the geocache locations for that area.
6. Tap the Crosshair Icon in the bottom right to display your location. Now you know where you are.
7. Move the map around and determine the best route to the colored Geocache point you want to find.
