

DOWNTOWN POULSBO

A Parking System Fit for Downtown Poulsbo

Access for all—whether through driving and parking, or other modes of travel—is essential to the cultural, economic, and social vibrancy of Downtown Poulsbo. As our Downtown evolves and we prepare for the future, the City of Poulsbo is taking a holistic look at our Downtown parking options, programs and policies and studying changes to better support the people that live, work and play Downtown and make it the special place that it is. This work will be done in close partnership with the Downtown Parking Advisory Committee and with the community.

WHY NOW?

1. **Advancements in how, when, and where we manage parking will improve the experience for all users.**

As our community has changed and grown, so has the parking industry. New practices, ideas, and technologies can help create a better parking and mobility experience for everyone in Poulsbo if implemented correctly.

2. **More advanced parking management can support our active downtown for the future.**

Being strategic about our parking management practices can help us achieve our most important community goals, like promoting economic strength, improving our already strong quality of life, sustaining the surrounding natural beauty and environmental health, and preserving our deep history and cultural heritage.

SHARE YOUR VOICE!

This project aims to improve parking and access options for all who live in, work in, and enjoy Downtown, today and in the future. Because of that, every person living, working, recreating, or using services in Downtown Poulsbo is a key partner in this effort.

Share your voice and shape project outcomes by taking our **online survey**.
