## 2024 Biased-based Policing Analysis

2/21/2025

The most frequent way police agencies attempt to learn whether bias-based policing is systematically occurring is through the analysis of discretionary traffic stops and enforcement. The Poulsbo Police Department tracks infractions through the electronic capture of SECTOR (Statewide Electronic Collision and Ticket Online Records) Ticketing data. The infractions contain discoverable demographic information.

I have reviewed the Criminal Traffic and Traffic Infraction citations in the table below. I have found no indication of racial profiling or bias based on these statistics. Poulsbo Police officers issued 203% more citations (both criminal and traffic) in 2024 than they did in 2023. This increase was due to loosening restrictive laws placed on operational parameters in the realm of traffic enforcement and an increased focus on traffic-related issues for our patrol officers.

If the officer could not distinguish the race/ethnicity of the individual, the designation of unknown was placed in the race box. Demographic statistics for the City of Poulsbo (population 12,171) and Kitsap County (population 277,658) are listed at the end of the table.

## CONCLUSION

In my review, I have found no evidence of bias-based policing in the Poulsbo Police Department. The demographics of the city/county, the listed statistical data, and the lack of specific complaints support this conclusion.

I recommend the Poulsbo Police Department maintain its current course of providing annual training to all employees regarding bias-based policing and other similar practices that promote fairness, ethics, racial equity, and awareness in their interactions with all community members.
