A boundary line adjustment may not result in actions requiring the replat, amendment, alteration, or vacation of a plat or short subdivision, and must be consistent with all applicable zoning, health, building and engineering regulations. In general, boundary line adjustment purpose applies to minor boundary changes, correct a controversy regarding the location of a lot line, remedy property use constraints caused by adverse topographical features, consolidate previously platted lots into a single or fewer parcels, or other similar circumstances. For additional information on submittal and review requirements, refer to PMC [Chapter 17.30](#).
